## **YELLOW WINGS**

MICK EEKHOUT & LOES VAN DER HORST STADSDEEL AMSTERDAM ZUIDOOST NETHERLANDS, AMSTERDAM 2015

In accordance with the previous design of the Bijlmobiel, one short and one long pylon were set up in the pond. In between the pylons four suspended cables were attached. To these cables overlapping faces were fixed and inter-connected, creating a vivid ensemble of wings. The faces consist of 100 millimeter parallel aluminium strips.
