| Year | 2014 |

In the context of the A15 highway widening between the Maasvlakte and the Vaanplein, the Dutch directorate for public works and water management realises the largest lift bridge of Europe in the port of Rotterdam. Octatube has realised the fully prefabricated bridge operator house, overlooking the Oude Maas river. It is one of the first projects in which the steel structure is completely executed according to NEN-EN-1090 (execution class 3).
